Excursions TO ASTANA

Today, students visited a
number of sightseeing
places in Astana

Monument "Astana-Baiterek"

Museum of the First President of the Republic of Kazakhstan

Astana School Children's Palace

National Museum of the Republic of Kazakhstan

Palace of Independence

Astana School Children's Palace presents an open active pedagogical system, which main objective is to give children and young people socially significant positive aims and the means to achieve it and the staff for joint activity according to interests. In 2013-2014 school years in the School Children's Palace work 109 circles in 630 groups which cover 9088 children.

Monument "Astana-Baiterek"
Bayterek (Kazakh: Бәйтерек, Bätterek, "tall poplar [tree]"), is a monument and observation tower in Astana. A tourist attraction popular with foreign visitors and native Kazakhs alike, it is emblematic of the city, which became capital of the country in 1997.

The Museum of the First President of the Republic of Kazakhstan is a museum about contemporary Kazakhstani history. The Museum was established by decree of the President on August 28, 2004. The main idea of the exhibitions is to show the formation of the state sovereignty of the republic and the historical role of its first President, N.Nazarbayev, in building the independent democratic state.

National Museum of the Republic of Kazakhstan consists of 5 branches: the Museum of history of Astana, the Museum of history of independent Kazakhstan, the Museum of history of Kazakhstan, the Gold Museum and the Museum of modern art. In the new Museum will contain gold relics, jewelry, archaeological materials, photo and video materials. The area of the Museum is 73 thousand square meters, it will be several exhibition halls and each room will equipped with interactive features.

Discussion and Translation of Experimental problems

President of the International Physics Olympiad (IPHO) Hans Jordens commented on the training level of Kazakh students who participate at world's major scientific events.

"Kazakhstani teams have been doing quite well during the last 5 years, especially in International Physics Olympiad. Your students constantly win medals or become winners of major competitions. You have and you want more gold, silver, and bronze medals. In my country, the Netherlands, we can sometimes be satisfied with a pair of bronze medals," he said in a briefing with Kazakhstani media.

According to Mr. Jordens, success is not accidental in the case of Kazakhstani students. "I do not think that the Kazakh children are somehow different from other children of the world. This is due, I think, first of all to the level of education in the country, with the preparation of students for global competitions, and, of course, to the coaching staff. Therefore, we can say that I admire your students' performance in international competitions. In science, you cannot be successful if there is no desire, no drive. Your students have that and they are very focused on positive results", he concluded.

IPHO is organized at the highest level - USA Team leader

International Physics Olympiad in Astana (IPhO) has been organized at the highest level, this was said by the leader of the USA Team Paul Stanley.

"I can say that the Olympiad in Astana is organized at the highest level. Our students say that they like the atmosphere, organization, accommodation, food. They are happy to be in Kazakhstan", said P. Stanley.

According to his words, all the participants have a chance to become a winner of the Olympiad.
